DETAILED ACTION

Notice to Applicant

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 22, 2006 has been entered.

Response to Amendment

2. In view of applicants amendments and arguments filed on June 22, 2006, the rejections of claims 1-14 and 16-17 under 35 U.S.C. 103(a), as stated in the Office Action mailed on January 23, 2006, have been withdrawn.

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. Authorization for this examiner's amendment was given in a telephone interview with Mr. Nathaniel McQueen on August 30, 2006.

5. The application has been amended as follows:

- Cancellation of claim 15.

Reason for Allowance

6. Claims 1-4, 7-14 and 16-17 are allowed.

The following is an examiner's statement of reasons for allowance: claim 1 recites (b) forming extension implanted layers in the semiconductor region by implanting first impurities of a second conductivity type in the semiconductor region using the gate electrode as a mask and forming pocket implanted layers in the semiconductor region by implanting second impurities of the first conductivity type in the semiconductor region using the gate electrode as a mask; (c) after the step (b), forming fluorine implanted layers in upper portions of the extension implanted layers by implanting fluorine in the semiconductor region using the gate electrode as a mask; (d) after the step (c), forming extension diffused layers of the second conductivity type made from diffusion of the first impurities in top portions of the semiconductor region by performing first heat treatment and forming pocket diffused layers of the first conductivity type made from diffusion of the second impurities in portions of the semiconductor region under the extension diffused layers by performing the first heat treatment, (f) forming source/drain implanted layers in the semiconductor region by implanting third impurities of the second conductivity type in the semiconductor region using the gate electrode and the sidewall as a mask. These features in combination with the other elements of the claim are neither disclosed nor suggested by the prior art of record.

Claims 2-4, 7-14 and 16-17 depend from claim 1, so they are allowed for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
